Summary

- February currently has the highest number of new users in a month. The number of new users in the Month of February 2023 was **102%** higher than that of January 2023 and **15%** higher than the previous peak, which was in October 2022
- There was a **15%** decrease in the number of views in February when compared to January 2023. This is still impressive, giving the outstanding gains in the number of views for January. February is the month with the second-highest number of views.
- The average Tweet impressions January 2023 was **56.4%** higher than in December 2022.
- **Monday** maintained its position as one of the best days to make tweets. Posts made on **Wednesdays** also did well when compared to posts made on the other days

- The number of scrolls isn't growing in proportion to the number of page views.
This may be translated as less time spent on these pages. Having strategies that will encourage readers to read to the end (eg the use of hooks) may help make improvements
